

CONTROL

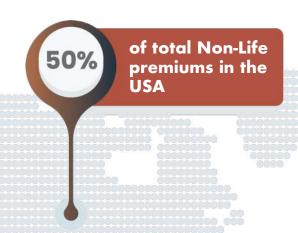

Everyone is familiar

- One size fits all
- Specify risk and premium is determine according to risk profile
- Premiums paid and no claims money in the water

CONTINGENCY POLICY

- Tailormade risk solution
- Wider scope of risk categories
 - General/commercial policies unwilling to provide cover for certain risks or too expensive to obtain cover
- Reduce cost of general/commercial premiums over time
- Prevent property loss and accept portion of risk
- Surplus premiums transfer to following underwriting year or return to client for good risk management

GENERAL/COMMERCIAL VS CONTINGENCY

General/Commercial

Risk transfer/cover obtained

Premium amount

Premium paid and no claims

Full amount of risk specified

Calculated by insurer to cover full amount of the risk specified

Money in the water / minimal reward for good risk management

Contingency

Usually 120% of the premium purchased

on the amount of cover to be obtained

Unclaimed premiums transfer to next year or returned to client for good risk management

TRYING TO ACHIEVE

Do's

- Create long term risk management structure
- Sustainable long term risk management structure. Reduce insurance cost over time and grow independence according to risk appetite and unique circumstances
- Continuous monitoring of risk vs claims and getting balance right
- Risk management partner

Don'ts

- Broker obtain cheaper premium but no risk management
- Insure everything commercial as more commission

- Review annually and add risk when company grow
- Just a broker getting cover
